

# Graham Mickle

Software Engineering Specializing in Web Development

## EXPERIENCE

### **Contracting, Remote — Software Engineer**

2018 - Present

Node, Express, Vue, Vuex, React  
Docker server architecture  
Babel ES6/7 JavaScript development  
PHP 7.2 Symfony Framework development  
MySQL Redis, Git (Flow), HTML, SCSS, Webpack

### **Midigator (Influx), San Diego — Software Engineer**

June 2015 - October 2017

Built entire white labeling compatible Frontend of Midigator  
Employed on the Feature Team of Midigator  
Taught and Led team to use Docker and assisted with migration to AWS  
Led hiring of Web development and Frontend positions  
Laravel 5.x Full Stack Development  
Agile Feature Web Development  
PHP 7.x, MySQL, Redis, node.js, JavaScript, jQuery, Git Flow  
HTML 5, CSS 3, Gulp, Sass, Python, Highcharts, Datatables

### **Hashtag Ads (Influx), San Diego — Frontend Developer**

December 2013 - June 2015

Built entire Frontend of Hashtag Ads application  
Developed on OOP Kohana framework  
PHP 5, HTML 5, CSS 3, JS, jQuery Frontend  
Led with hiring of Web Development, Frontend, and Design positions

### **Einstein Industries, San Diego — Frontend Engineer II**

August 2010 - December 2013

Built & Maintained 1000s of websites  
Web application Interface Design  
PHP application design, development, and maintenance  
Git & SVN Repository management as well as trained team  
Custom CMS theme building, PHP and MySQL development  
Photoshop web interface design  
W3C standards HTML 5 and CSS 3 development  
JavaScript development with jQuery, jQuery UI, Prototype  
Web application testing  
Fast paced, high priority project coordination and management  
Web design and development training

## SKILLS

Node, Express, Vue.js, React  
PHP 7, Laravel 5.x  
MySQL, Redis  
Docker, Git Flow  
JavaScript, jQuery, Highcharts,  
Datatables  
HTML 5, CSS 3, SASS, LESS, Gulp,  
Webpack, Photoshop  
Agile Methodologies

## AWARDS

Outstanding annual reviews every  
single year at Midigator & Hashtag  
Ads

Assigned to most important,  
Corporate team at Einstein  
Industries

## REVIEWS

Graham is an intelligent developer,  
during the 3 years that I worked with  
him I found him a hardworking and  
dedicated programmer that always  
delivered his features in the requested  
timeline. His enthusiasm to better the  
existing code and researching better  
ways to do things is remarkable. I  
enjoyed working with him and there  
were so many times that we worked on  
related features together and I learned  
a lot from him.

### **Ardy Aryan, Direct Technical Lead, Midigator**

I've had the opportunity to work closely  
with Graham over the last 4 years on  
software projects at Hashtag Ads and  
Midigator. Graham has an excellent  
talent for detail, organization/process  
and the delivery of high-quality,

## **Best Rank, San Diego — *Web Developer***

May 2009 - April 2010

Web Application Development  
Drupal 5 & 6 Module Development  
Drupal E-commerce implementation and maintenance  
Drupal Theme Development  
Wordpress Theme Development  
SVN Deployment & Administration  
Outsource Team Management  
Project Management  
Built Google Maps API geolocation search database  
Apache Solr Custom Integration  
Network Systems Administration

## **Einstein Industries, San Diego — *Production Engineer II***

July 2007 - May 2009

Built & Maintained 1000s of websites  
Photoshop & Web application Interface Design  
PHP application design, development, and maintenance  
Git & SVN Repository management as well as trained team  
Custom CMS theme building, PHP and MySQL development  
W3C standards HTML 5 and CSS 3 development  
JavaScript development with jQuery, jQuery UI, Prototype  
Web application testing  
Fast paced, high priority project coordination and management  
Web design and development training

## **SONY COMPUTER ENTERTAINMENT, San Diego**

### ***Web Applications Tester***

February 2006 - December 2006

Resolved hardware, software, and network problems  
Testing: CSS, HTML, DHTML, AJAX, MySQL, PHP, Math Function,  
Javascript, and Graphical Interface  
Graphic creation with Photoshop  
Installation and creation of MediaWiki documentation of  
Quality Assurance Tools  
Computer hardware and software technical support and repair  
Windows networking and data transfer  
Printer driver installation and networking  
Web testing and training  
Network security consulting

thoughtful engineering solutions. His ability to grasp everything from business concepts to interface details allows him to tackle challenges with a comprehensive approach vs single, narrow solutions.

I've worked directly with Graham, mostly on front-end, to build 2 separate web interfaces from the ground up. Defining responsive pattern and component libraries which support a complex web UI. He feels a strong responsibility to the end-user (which is rare in engineers), and understands the back-end logic necessary to deliver meaningful experiences for every interaction.

Graham would be a strong asset to any engineering team. He's a senior developer capable of contributing in numerous areas and languages. His ability to connect concepts to code would prove valuable at any company level.

**Matt Bailey, Creative Director, UI/UX Designer, Midigator**
